

## 2021 Veterinary Stud Plan Information

**Fresh, chilled semen £280 – 3 cycles**

During her stay at Country Farm Stud, your mare will be under the veterinary care of North West Equine Vets Ltd. The practice is approved by the British Equine Veterinary Association as being skilled in the procedure of A.I. using both chilled and frozen semen and our vets are experienced in equine stud medicine and A.I.

### **Our 2021 Stud Plans include the following for up to 3 cycles in 2021 Stud Season:**

- All stud related visits
- All pre- and post-insemination ultrasound examinations
- Drugs used to routinely control the oestrus cycle and induce ovulation
- Routine post-insemination uterine management including oxytocin, a single uterine flush per cycle (if required) and a single intra-uterine antibiotic treatment per cycle (if required)
- Repeat pregnancy scans up to day 45

### **Please note that the following are NOT included in the plan prices:**

- Artificial Insemination procedure (This is done by Country Farm Stud's trained and qualified inseminators and the charge is payable directly to the Stud)
- CEM, EVA and/or EIA testing
- Drugs used to facilitate safe examination of your mare such as sedation or Buscopan<sup>TM</sup>
- Management of excessive intrauterine fluid including repeated washouts, antibiotics, saline solution and uterine lavage sets
- Twin reduction
- Investigation or treatment of subfertility/infertility such as endometrial swabbing/biopsy, endometritis or Caslicks procedure
- Use of Regumate<sup>TM</sup> hormone treatment
- Investigation or treatment of any other illness or injury
